Experiences

2013-present: Manager - Technical Publications, Cloudmark

Leading the international technical publications team to deliver accurate and on-time documentation materials with close interaction with Product Management, Engineering and QA teams. Migration and standardization of content management, from both FrameMaker and XML through a complete Continuous Integration system, based on DITA content built with DITA-OT. Development of custom DITA-OT plugins (PDF, custom Webhelp, custom online review mode) and specializations (troubleshooting, REST API, etc.). In charge of Crédit d'Impôt Recherche write-up and full review (French Tax refund credit based on innovation and R&D)

2010 - 2013: Manager - Product Engineering, Cloudmark

Coordinating engineering teams in San Francisco and Paris for development of Security Platform products, with various missions, on behalf of offshore management team. Leading/developing R&D projects on leveraging Big Data: real-time scalable storage, real-time analysis tools, etc.

2008 - 2010: Sr Technical Writer, Bizanga, Cloudmark

Producing XML documentation for Security Platform products (MTA only at the time) In charge of Crédit d'Impôt Recherche write-up and full review (French Tax refund credit based on innovation and R&D)

2001 - 2010: Lecturer - Teacher, Université Paris 7, HETIC, etc.

For various schools and Universities in France, I was in charge of various technical classes around Technical writing, engineering, scripting and meta languages, etc. In 2003, I was appointed as a Master's degree diploma juror.

2003 - 2008:	Documentation Engineer, Technical Writer, Freelance
	For over 50 customers: Creating and customizing complete documentation systems, based on the company's abilities, existing teams, processes, etc. Advice, training and coaching to customer teams in recruiting technical writers, migrating documentation systems, localization projects, etc. Writing technical documentation for a variety of software and hardware, in both English and French Developed a SaaS-like Technical writing tool, called B.O.X (Bibliothèque d'Objets XML, or XML Objects Library) meant for customers to write their content online, and publish with 0 effort to PDF, XHTML, etc.

Recommendations

- **Lucy Veisblat**, CEO of eCreation, while freelance

  "I have worked with Guillaume on several projects. On each occasion, he demonstrated his ability to understand client requirements and offer a solution, he provided outstanding technical services and he always met the deadlines."

- **Alexandre Lachmann**, customer, co-founder of RunMyProcess (now Fujitsu owned)

  "Excellent work : a pleasure to work with him (fast learning, creative...)"
